                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           GRP1_PETHY P09789;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             _PETHY
                                                                                                                                                                                                                                                                                "A gene encoding a novel glycine-rich structural protein of petuni nature 323:178-181(1986).

-I- FUNCTION: RESPONSIBLE FOR PLASTICITY OF THE CELL WALL (POTENTI-I-SUBCELLIGIAR LOCATION: CELL WALL (POTENTIAL).

-I- MISCELLANEOUS: THIS PROTEIN CONTAINS 67% GLYCINE RESIDUES.

-I- MISCELLANEOUS: 90% OF THE MATURE PROTEIN RESIDUES ARE CAPABLE FORMING A BETA-PLEATED SHEET COMPOSED OF 8 ANTI-PARALLEL STRAN

-I- MISCELLANEOUS: THE GLYCINE-RICH REGION IS COMPRISED OF TWO REL

FAMILIES OF REPEATS, F1 AND F2, EACH REPEAT CONTAINING ABOUT 4
